

Used all over the world the 870 is the market leading belt planter. With a 7 speed pulley drive courtesy of adjustable height landwheels, the 870 can work on the flat or bed setups. Available from 2 rows up to 18 rows and capable of multiline planting, the 870 is robust, scalable and adaptable for every seed type.

#### Key Features

- 1 5mm depth adjustment increments via coulter stem between 0-50mm
- 2 Floating linkage
- 3 Adjustable rear wheel pressure via spring
- 4 4 litre seed hopper
- 5 Wheel scrapers
- 6 Adjustable height landwheels

## Belt Drills

Stanhay's belt metering units are lightweight, simple and extremely versatile and can be used with a wide range of both raw and coated seeds. From a pedestrian operated unit to large tractor mounted machines our drills can suit both the small and large grower.

The metering unit accurately places seed in the ground with the minimum of damage as every moving part is rubber covered. Seeds in the hopper fall past the choke which regulates the quantity of seed in the chamber. The seed belt is rotated clockwise by the drive

wheel while the repeller wheel rotates anticlockwise to remove excess seed away from the holes in the belt only allowing the required amount to drop through at the end of the spring base. The seed drop into the bottom of the furrow is only 25mm minimising bounce or roll of the seeds.

By fitting the right combination of coulter, choke, base and seed belt punched with the correct size and number of holes in single, double or triple lines you can plant a wide variety of seed types at any spacing or pattern. Swapping these items to switch between seed types can all be done without the need for tools.

The metering unit can be fitted into three different chassis types to suit a range of grower requirements.

Just some of the seeds you can handle are listed below:

- |             |             |            |
|-------------|-------------|------------|
| Asparagus   | Cucumber    | Peas       |
| Beans       | Fodder Beet | Pepper     |
| Broccoli    | Kale        | Radish     |
| Brussels    | Leek        | Red Beet   |
| Cabbage     | Lettuce     | Spinach    |
| Carrot      | Mustard     | Sugar Beet |
| Cauliflower | Onions      | Swede      |
| Chicory     | Parsley     | Sweet Corn |
| Coriander   | Parsnip     | Tomato     |

### 870 Data Table

PLANTER TYPE	SEED TYPE	MULTILINE CAPABILITY	HOPPER CAPACITY (LITRES)	TOOLBAR	MINIMUM SEED SPACING	MIN/MAX SEED SIZE	MIN/MAX NUMBER OF ROWS PER MACHINE	MINIMUM ROW SPACING	MINIMUM LINE SPACING	APPROX ROW UNIT WEIGHT (KG)
BELT	NATURAL + PELLETED	1-3 LINE	4 / 8	60MM DIAMOND	10MM	1MM/15MM	2-18+	200MM	25MM	35
